This event is fully booked or has passed.

Early predictions of 'Convergence' were made in the mid 1970's. However, the pace of change has been turbo charged from the mid 1990's by the Internet and mobile communications. This talk will take the audience through the evolution of convergence from a theory to the reality of today where convergence of IT, telecommunications and the media is changing the world of consumers and industry.

Date and Time

Tue, 16 Feb 2016

17:45 - 19:30 ACDT
