★ 102^[2]

This event is fully booked or has passed.

[3] This is a limited opportunity for TelSoc financial members to visit nbn's Network Operations Centre (NOC). The NOC is the nerve centre of the **nbn** network providing state of the art network monitoring 24 hours a day, 365 days a year of the entire national multi-technology network. It is a single point of contact for all of **nbn** partners to activate services, manage enquiries and to rectify **nbn** network faults. The NOC offers multi-tiered support for customers and the network including the:

- Network Surveillance Team - 24/7 network monitoring and proactive management of the network
- Operations Support Team - supports a comprehensive network maintenance programme

Register now to avoid any disappointment. If you happen to miss out on joining this time round, please don't worry as we expect to organise additional visits in the new year.

[4] The NOC is located in the Dockland's Innovation Building (pictured) which has a black and green facade and is located directly behind the Customs Building.

On arrival report to the reception desk on the ground floor where you will be received by security.
