This event is fully booked or has passed.

[3] In the past First Responders and others requiring Mission Critical Communications have used their own networks based on two-way radio. With increasing demand for broadband this is no longer the optimal solution. Attempts in the past to use "Push-to-Talk" (PTT) on cellular networks have been less than optimal, but with the work of ETSI, 3GPP and other standardisation bodies, the needs of these users have been integrated into 4G and 5G standards.

This talk outlines the needs, challenges and solutions and explains how critical communications are integrating into the new standards and what directions and levels of integration we can see with other forms of Telecommunications in the future.

Date and Time

Tue, 26 Feb 2019

12:30 - 13:30 AEDT

Location

Telstra Experience Centre
1st Floor, 242 Exhibition St
Melbourne VIC 3000
Australia

Presenter(s)

Kevin Graham

Kevin Graham is a Director of The Critical Communications Association (TCCA). He is a founding director of the North American Tetra Forum and was previously Managing Director of both Sepura and Simoco, after a long career in this area in Philips and Motorola. He will be joined by others from the TCCA in giving this speech, which will be broadcast live around Australia, including a venue in Sydney.
