TelSoc Members,

We have an interesting forum online on Tuesday lunchtime on how NBN Co could benefit from integrating 5G into the broadband mix.

5G is often misunderstood as just the next generation of mobiles; it is far more.

The 5G "core" will be the architecture for both mobile and fixed networks over the next few years.

It is not only a threat to fixed networks, but also opens new opportunities.

The event is already well subscribed, but there is online "space" for more participants.

Please sign up here: <https://telsoc.org/event/broadband-futures-forum-rise-5g> [3]

The presenters probably don't have all the answers, but they are posing some excellent questions!

See you online.

Tim Herring
