★ 51 [2]

The latest issue of our journal, the Journal of Telecommunications and the Digital Economy, is now available at <https://telsoc.org/journal/jtde-v10-n1> [3]. Please have a look at it.

The latest issue has an underlying theme of low earth orbit satellites (LEOs). We have an account of the Broadband Futures Forum presented by OneWeb on its plans and progress. There is a paper from another Futures Forum on the Australian Broadband Advisory Council's expert working group report on agri-tech (agricultural technology) in regional Australia. And a commentary on the working group report by one of our members. We also reprint an article from the TJA on the Iridium satellite network.

In addition, there are three papers on various aspects of telecommunications operations and technology, and an obituary for Gavan Rosman.

As always, we welcome any comments or feedback you may have.
