Latest TelSoc Journal Issue, a Special Issue, Now Available

Journal of Telecommunications and the Digital Economy

3rd April 2024

[1]

★ 14 [2]

The latest issue of our journal, the *Journal of Telecommunications and the Digital Economy*, is now available on the TelSoc website at <https://telsoc.org/journal/jtde-v12-n1> [3]. Please have a look at it. You can download the full issue (towards the bottom of the issue page) or select individual articles. Warning: the full issue has 664 pages! All content is free to TelSoc financial members (when logged in).

The March issue features a Special Issue section on **Emerging Technologies and Innovation for Digital Economy and Transformation**, consisting of 23 articles and a guest editorial. The Guest Editors, Rim Jallouli, Mohamed Anis Bach Tobji, Ana Maria Soares, Beatriz Casais and Meriam Belkhir, are from universities in Tunisia and Portugal. The articles provide a panoramic view of issues related to digital transformation from around the world. Read the guest editorial (<https://telsoc.org/journal/jtde-v12-n1/a945> [4]) for an overview and summary.

The March issue includes other content:

- A Special Interest paper, *Growing Australia's Creative Industry* [5], based on the Australian Broadband Advisory Council's report from 2022;
- Three papers in the Telecommunications section on technology, security and operations;
- A review of a recent book on *Charles Todd and the Overland Telegraph Line* [6].

And the popular reprint from the *TJA* is back! This one is from 1971 and concerns the **East-West Radio Relay System** [7] from Northam in Western Australia to Port Pirie in South Australia. The reprint triggered Graham Shepherd to provide his *Recollections* [8] on upgrading the system.

As always, we welcome any comments or feedback that you may have.
