## M2M Connectivity

### LPWAN Technologies

---

Jose Torres

April 2017

Presentation: TelSoc

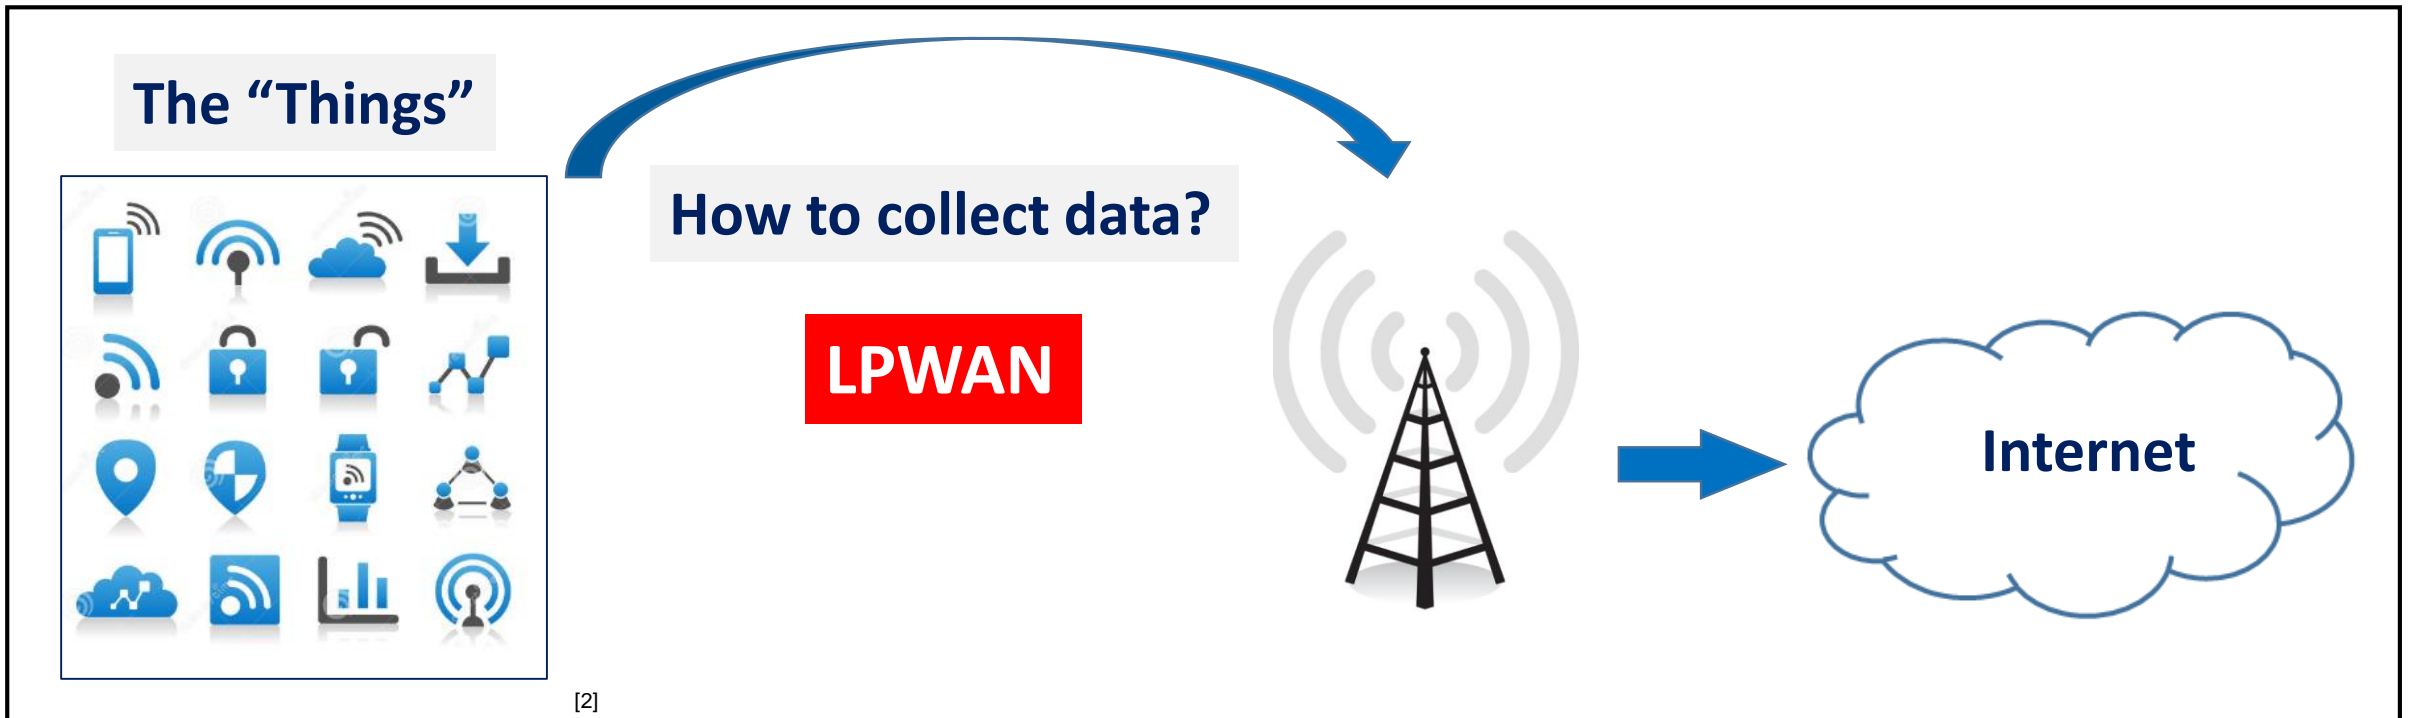

# Agenda

This presentation will cover:

- LPWAN in IoT
- Technical review on the more popular LPWAN technologies: Au/NZ market
- Live Demo if time permitted

# IoT (Internet Of Things)

- Connect any device to the Internet
- The “thing” could be a sensor, an animal, a car, ...
- There will be “things” that transmit tiny amounts of data, work on battery and “far” from base stations

# LPWAN (Low Power Wide Area Network)

## Context:

- Designed for Internet of Things (IoT)
- Low Power Devices (i.e. Power Efficiency) – years of use
- Long Range – Km
- Low Data Rate from the “Things”

## Several Technologies:

- There is no one-size-fits-all technology

# LPWAN (Low Power Wide Area Network)

# LPWAN (Low Power Wide Area Network)

# Cellular

## Standard Definition:

## Spectrum:

Licensed Band

## Network owner:

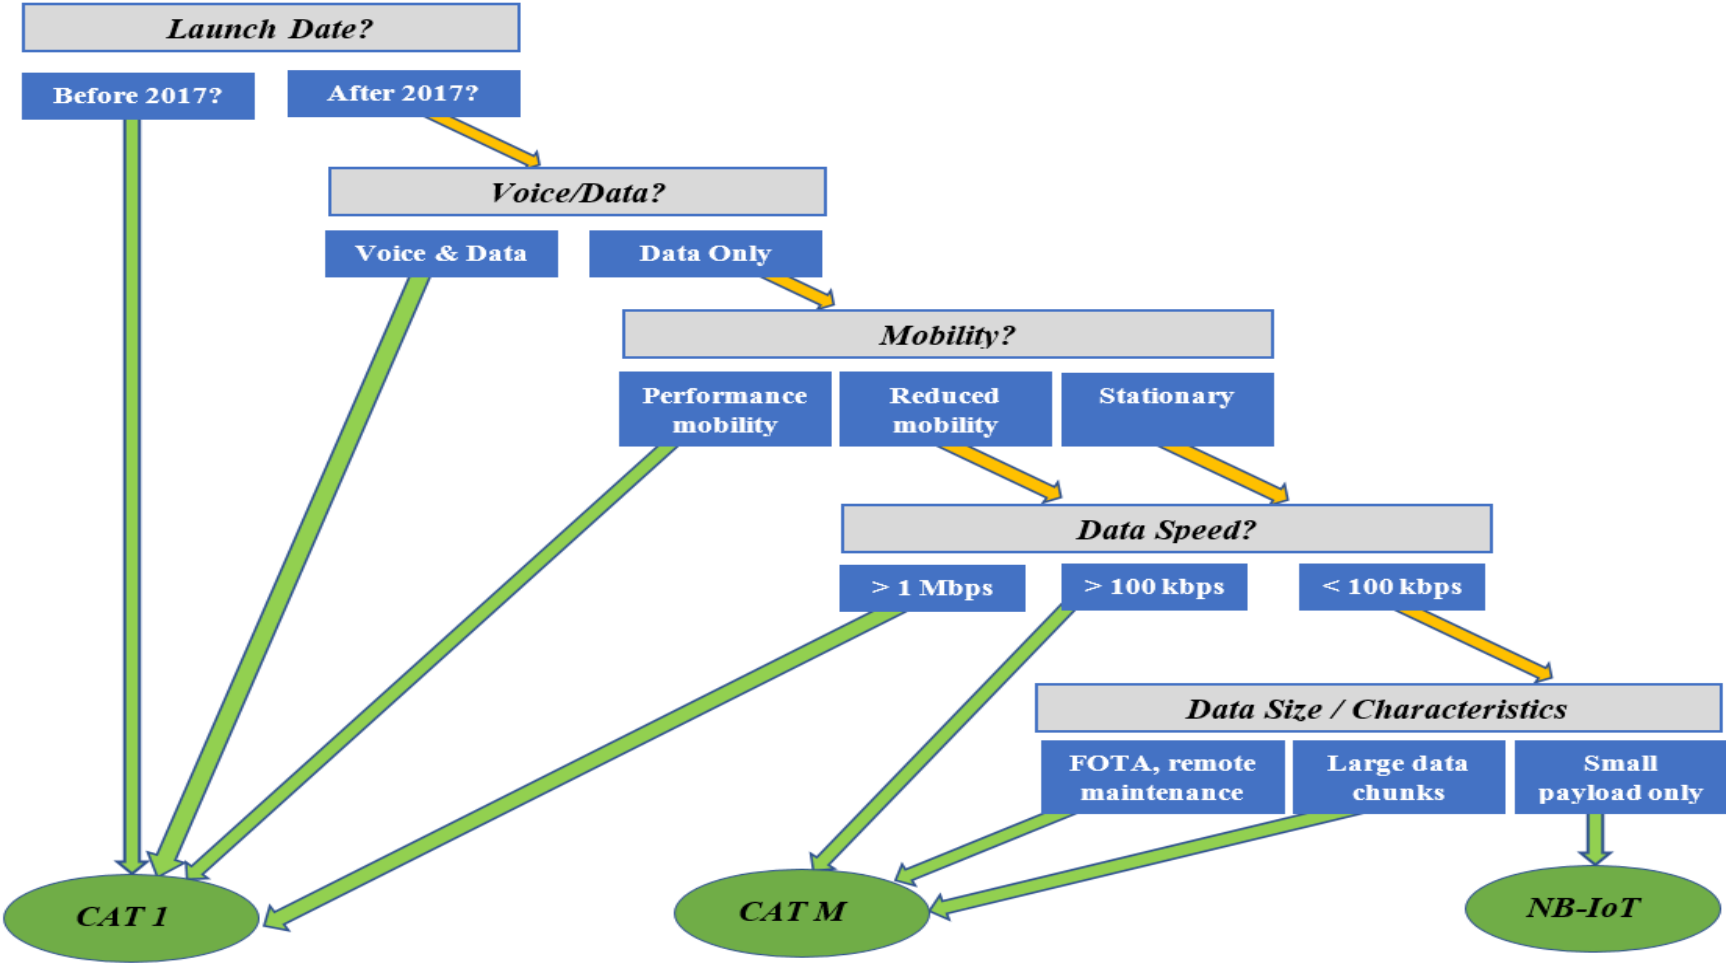

Telcos

# Cellular - Standard Evolution

	Cellular Technology			
	EC-GSM-IoT	LTE-CAT 1	LTE-CAT M1 (eMTC, referred as Category M or LTE - M)	NB-IoT (referred as LTE - CAT 2/M2)
Release	Release 13	Release 8	Release 13	Release 13
# Messages Per Day	Variable	Variable	Variable	Variable
Data Rate	< 140 Kbps (DL/UL)	< 10 Mbps (DL) < 5 Mbps (UL)	200 Kbps - 1 Mbps (DL/UL)	< 100 Kbps (DL) < 150 Kbps (UL)
Frequency Band	Licensed - GSM bands	Licensed LTE bands In-band	Licensed LTE bands In-band	Licensed LTE in-band guard-band stand-alone
Time to Complete	2017	2017	Late 2017	2018...

Standard Evolution:

[3]

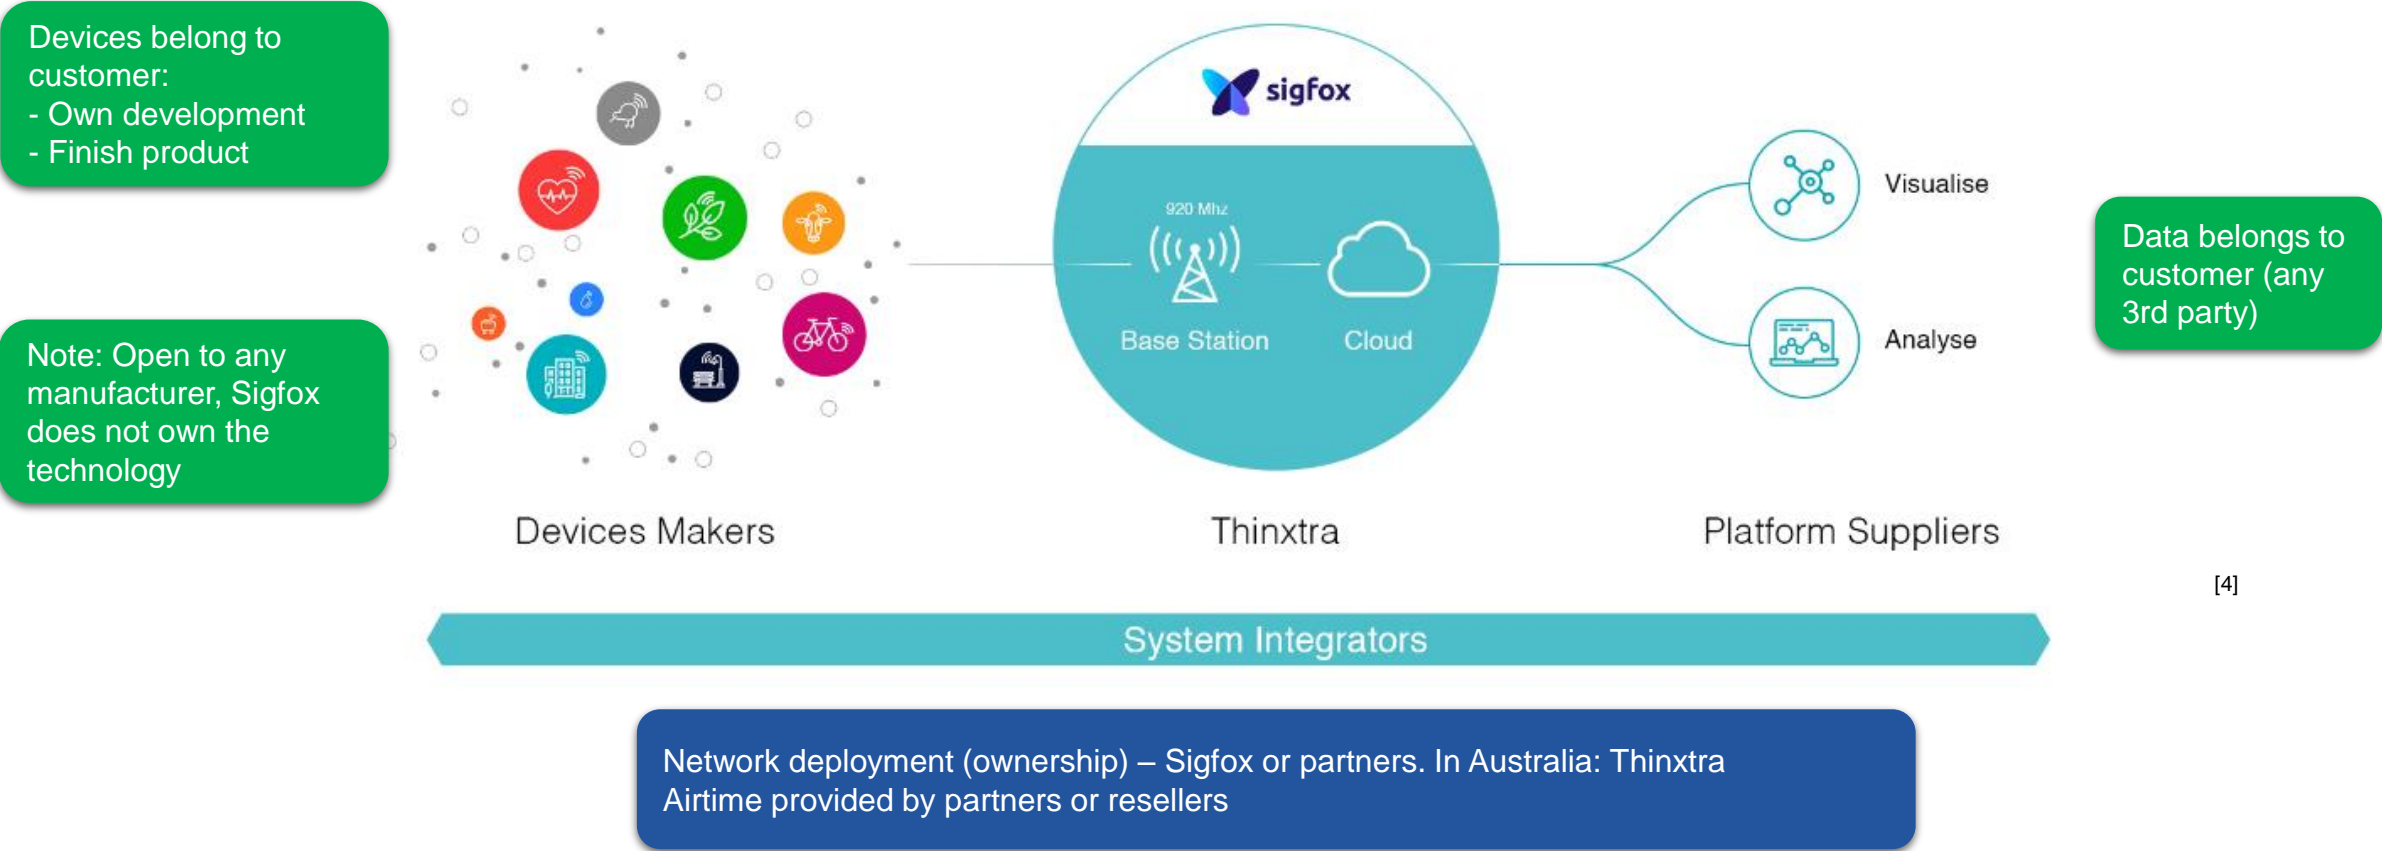

# LPWAN (Low Power Wide Area Network)

# Sigfox

Network Architecture:

[4]

## Capacity:

### Data

- 12 Bytes Max

### Range

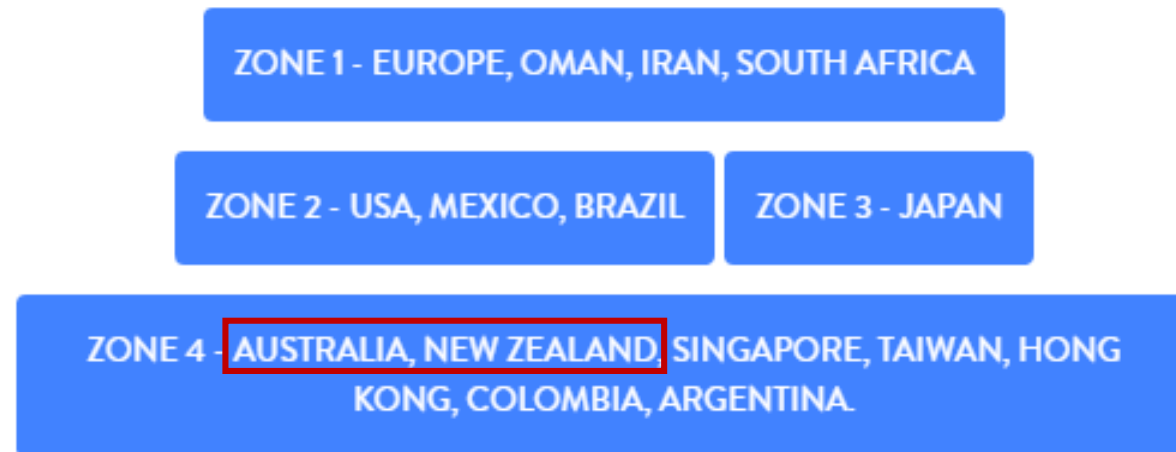

- 30 – 50 km rural areas
- 3 – 10 km urban areas

### Number of messages

- Up to 140 per day per sensor
- Up to 4 downlink messages per day per sensor

## Regulations:

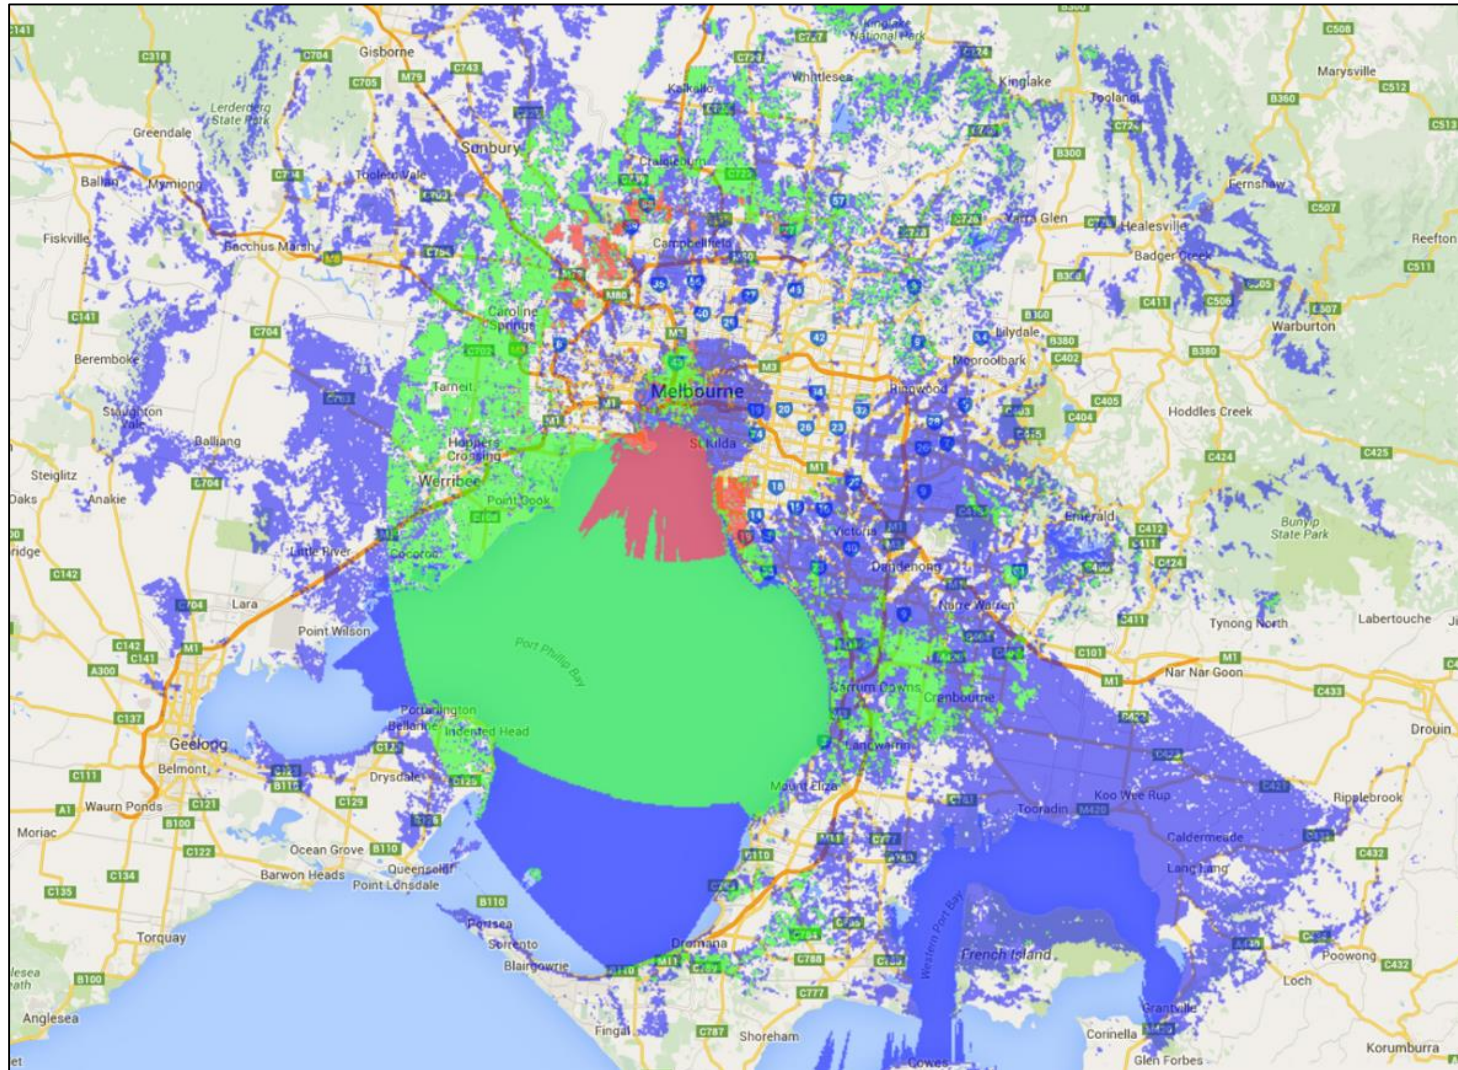

- Uses ISM band (free spectrum) – AUS/NZ: 920.8MHz UL / 922.3MHz DL (Ultranarrow band)
- Divided into 4 regions:

[4]

# Sigfox – Coverage in Melbourne

1 Base Station

2 Base Stations

3 Base Stations and more

42]

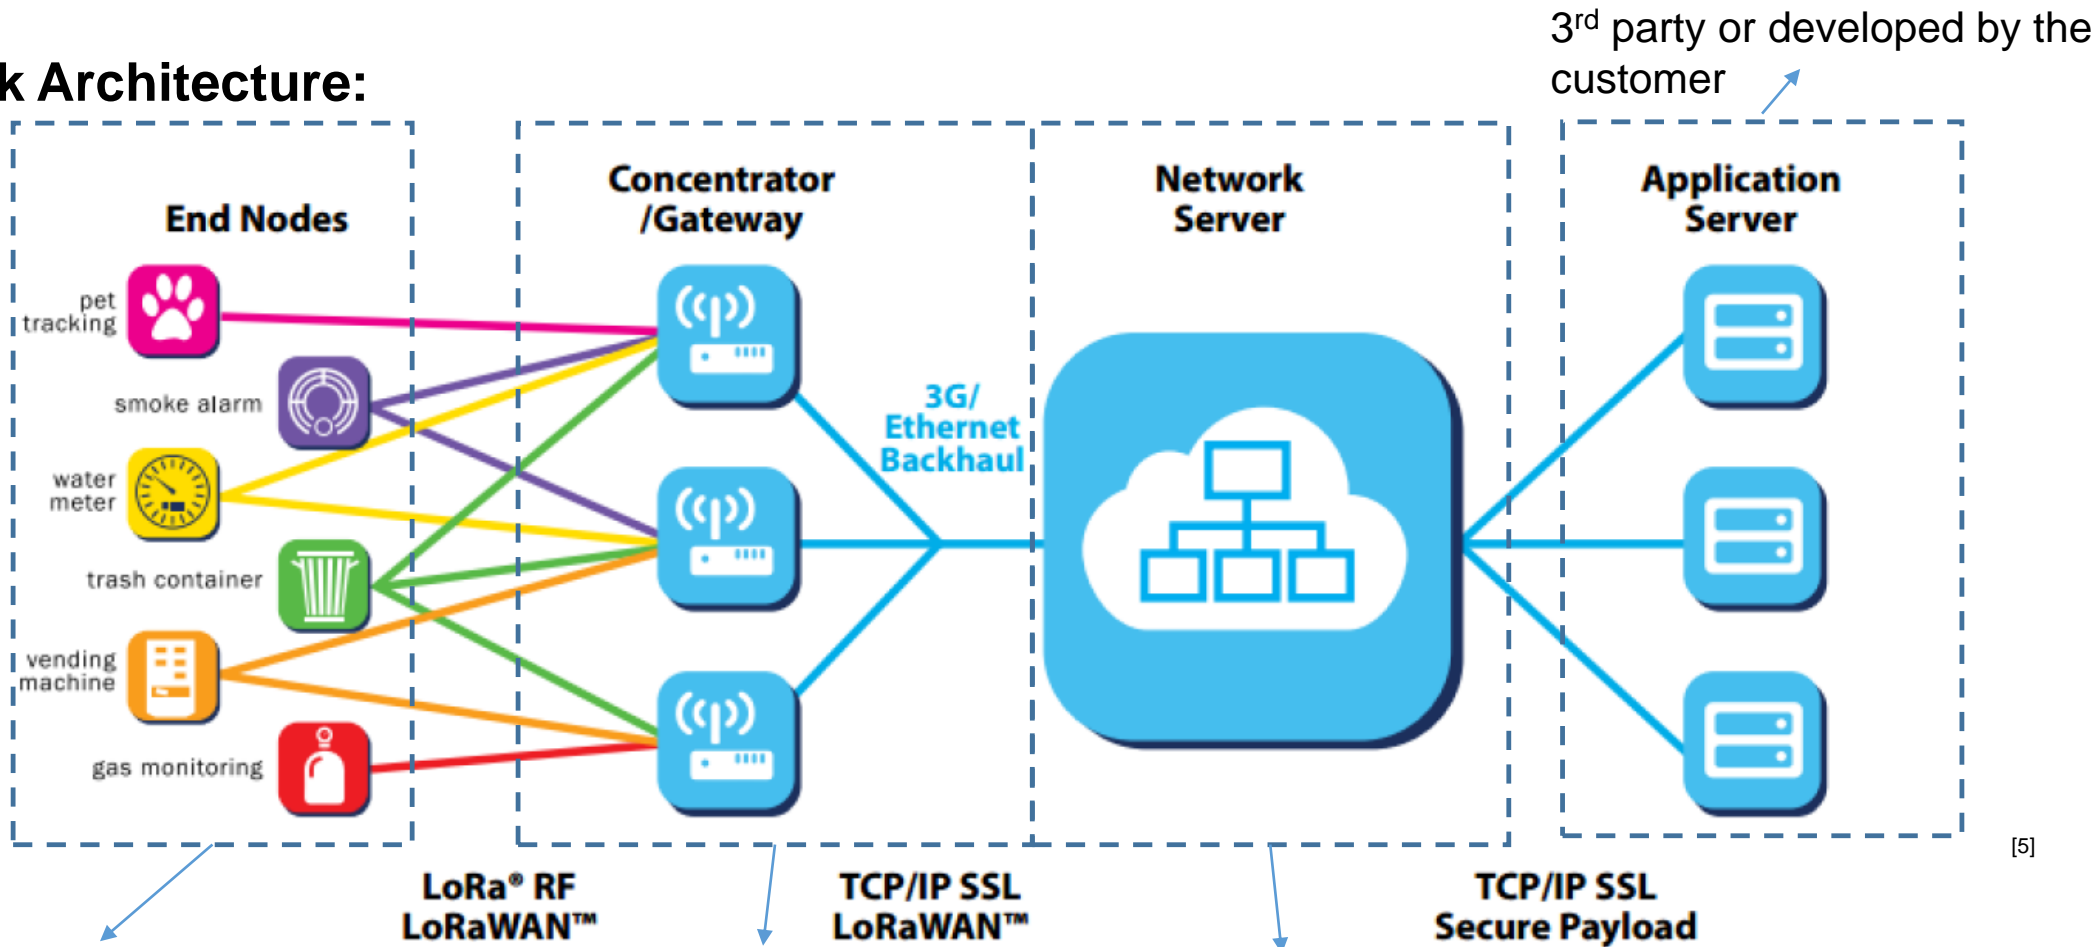

# LPWAN (Low Power Wide Area Network)

# LoRaWAN

Network Architecture:

Any module or finished product based on Semtech chipset and compliant with LoRaWAN specs

Deployed by customer – option: **Kerlink Wirnet 923** or **iBTS**

Kerlink has SPN software to run this, otherwise Kerlink runs an agent: LorIoT, Actility, The Things Network, etc

[5]

## Capacity:

### Data

- Up to 242 bytes when using fastest data rate

### Range

- 15 km rural areas
- 2 km urban areas

### Number of messages

- It depends on #sensors, channels on the gateway, etc.

# LoRaWAN

## Example:

876 msg/day  
per sensor

LoraWAN\_Calculator\_Australia

Author: Jose Torres. Created: February 2017
